Assessment Services

Lake Water Quality Testing and Research Services

Aquatic Systems has a fully staffed, in-house laboratory to provide complete water testing services to our clients. Laboratory data have many uses; including determining suitability of water for recreation or for irrigation. All water chemistry and bacteria test reports include full explanations and an aquatic biologist is available at our laboratory to answer all your questions.

The team, shown below, consists of the top professionals in lake science and experienced regional biologists who receive ongoing training to perform all tests to the highest standards.

FIELD ASSESSMENT SAMPLING

From identifying potential source points for excessive nutrients to oxygen and temperature levels; your assessments are performed by our highly trained field biologists.

BATHYMETRIC LAKE MAPPING

How deep is your lake? How thick is the vegetation? A 3-D map of the lake will help us treat the water more efficiently and/or specify the most effective aeration system.

WATER QUALITY LAB

Water is more than H₂O. It is comprised of a multitude of nutrients and particulates. Our lab scientists can perform over 30 specialized tests to determine your water's true chemistry.

ALGAE IDENTIFICATION LAB

To treat the algae, it's important to know what type of algae you are having problems with. We can identify both the type of algae and whether or not it is toxic

AQUATIC PLANT AND ALGAE LAB

Our in-house research lab studies difficult to control invasive species to find the most effective rate and types of treatments that minimize potential harm to the environment.

CONSULTING SERVICES

Our experts are available for water resource management presentations, or to just answer questions at your meetings. Continuing Education Units (CEUs) are also available.
