FY 2019 DEFICIT FUNDING AGREEMENT

THIS FY 2019 DEFICIT FUNDING AGREEMENT ("Agreement") is made and entered into to be effective the 1st day of October, 2018, by and between:

Avalon Groves Community Development District, a local unit of special-purpose government established pursuant to Chapter 190, Florida Statutes, and located in Lake County, Florida ("**District**"), and

VK Avalon Groves, LLC, a Delaware limited liability company, the primary developer of lands within the boundary of the District, and whose address is 701 South Olive Ave., Suite 104, West Palm Beach, Florida 33401 ("**Developer**").

RECITALS

WHEREAS, the District was established by ordinance of the Board of County Commissioners of Lake County, Florida, for the purpose of planning, financing, constructing, operating and/or maintaining certain infrastructure; and

WHEREAS, the District, pursuant to Chapter 190, Florida Statutes, is authorized to levy such taxes, special assessments, fees and other charges as may be necessary in furtherance of the District's activities and services; and

WHEREAS, the Board of Supervisors ("Board") of the District has adopted the District's operations and maintenance budget ("O&M Budget") for the fiscal year ending September 30, 2019 ("FY 2019") and has levied special assessments ("O&M Assessments") to fund a portion of the O&M Budget; and

WHEREAS, in connection with the adoption of the O&M Budget and the levy of the O&M Assessments, and in consideration for the District not levying additional O&M Assessments, the Developer has agreed to pay the O&M Assessments levied on its properties, and additionally to fund any portion ("O&M Deficit") of the O&M Budget needed by the District above and beyond the amount of the O&M Assessments actually levied;

NOW, THEREFORE, based upon good and valuable consideration and the mutual covenants of the parties, the receipt of which and sufficiency of which are hereby acknowledged, the parties agree as follows:

- 1. **RECITALS.** The recitals so stated are true and correct and by this reference are incorporated into and form a material part of this Agreement.
- 2. **FUNDING OBLIGATION.** The Developer agrees to make available to the District any monies necessary to fund any O&M Deficit for FY 2019, within thirty (30) days of written request by the District. The funds shall be placed in the District's general checking account and used to fund the actual administrative and operations expenses of the District's O&M Budget. The Developer agrees to fund any O&M Deficit for actual expenses of the District and up to the total amount of the O&M Budget; provided, however, that the Developer shall not be responsible for any O&M Deficit resulting from amendments to the O&M Budget, unless the Developer approves of such amendments. The Developer's payment of funds pursuant to this Agreement in no way affects Developer's obligation to pay O&M Assessments levied on lands it owns within the District.

To the extent permitted by law, and subject to completing any necessary lawful process, the District may elect in its sole discretion to levy and impose special assessments as part of the next annual budget cycle and thereby reimburse the Developer for any funds provided by the Developer pursuant to this Agreement. Any such reimbursement shall be made within 30 days after the District's receipt of the special assessment monies. In the event that the District does not elect as part of its next annual budget cycle to reimburse the Developer for any payments made hereunder, then the District shall not have any reimbursement obligation under this Agreement whatsoever.

- 3. **AMENDMENT.** This instrument shall constitute the final and complete expression of the agreement between the parties relating to the subject matter of this Agreement. Amendments to and waivers of the provisions contained in this Agreement may be made only by an instrument in writing which is executed by both of the parties hereto.
- 4. **AUTHORITY.** The execution of this Agreement has been duly authorized by the appropriate body or official of all parties hereto, each party has complied with all the requirements of law, and each party has full power and authority to comply with the terms and provisions of this instrument.
- 5. **ASSIGNMENT.** This Agreement may not be assigned, in whole or in part, by either party except upon the written consent of the other. Any purported assignment without such consent shall be void.
- 6. **DEFAULT.** A default by either party under this Agreement shall entitle the other to all remedies available at law or in equity, which shall include, but not be limited to, the right of damages, injunctive relief and specific performance.
- 7. **ATTORNEY'S FEES.** In the event that either party is required to enforce this Agreement by court proceedings or otherwise, then the parties agree that the prevailing party shall be entitled to recover from the other all costs incurred, including reasonable attorneys' fees and costs for trial, alternative dispute resolution, or appellate proceedings.
- 8. **BENEFICIARIES.** This Agreement is solely for the benefit of the formal parties herein and no right or cause of action shall accrue upon or by reason hereof, to or for the benefit of any third party not a formal party hereto. Nothing in this Agreement expressed or implied is intended or shall be construed to confer upon any person or corporation other than the parties hereto any right, remedy or claim under or by reason of this Agreement or any provisions or conditions hereof; and all of the provisions, representations, covenants and conditions herein contained shall inure to the sole benefit of and shall be binding upon the parties hereto and their respective representatives, successors and assigns.
- 9. **APPLICABLE LAW; VENUE.** This Agreement and the provisions contained herein shall be construed, interpreted and controlled according to the laws of the State of Florida. Venue for any action under this Agreement shall be in a state circuit court of competent jurisdiction in and for Lake County, Florida.
- 10. **ARM'S LENGTH.** This Agreement has been negotiated fully between the parties as an arm's length transaction. RESOLUTION 2018-09

A RESOLUTION OF THE BOARD OF SUPERVISORS OF THE AVALON GROVES COMMUNITY DEVELOPMENT DISTRICT MAKING A DETERMINATION OF BENEFIT AND IMPOSING SPECIAL ASSESSMENTS FOR FISCAL YEAR 2018/2019; PROVIDING FOR THE COLLECTION AND ENFORCEMENT OF SPECIAL ASSESSMENTS, INCLUDING BUT NOT LIMITED TO PENALTIES AND INTEREST THEREON; CERTIFYING AN ASSESSMENT ROLL; PROVIDING FOR AMENDMENTS TO THE ASSESSMENT ROLL; PROVIDING A SEVERABILITY CLAUSE; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the Avalon Groves Community Development District ("**District**") is a local unit of special-purpose government established pursuant to Chapter 190, *Florida Statutes*, for the purpose of providing, operating and maintaining infrastructure improvements, facilities and services to the lands within the District; and

WHEREAS, the District is located in Lake County, Florida ("County"); and

WHEREAS, the District has constructed or acquired various infrastructure improvements and provides certain services in accordance with the District's adopted capital improvement plan and Chapter 190, *Florida Statutes*; and

WHEREAS, the Board of Supervisors ("Board") of the District hereby determines to undertake various operations and maintenance and other activities described in the District's budget ("Adopted Budget") for the fiscal year beginning October 1, 2018 and ending September 30, 2019 ("Fiscal Year 2018/2019"), attached hereto as Exhibit "A;" and

WHEREAS, the District must obtain sufficient funds to provide for the operation and maintenance of the services and facilities provided by the District as described in the Adopted Budget; and

WHEREAS, the provision of such services, facilities, and operations is a benefit to lands within the District; and

WHEREAS, Chapter 190, *Florida Statutes*, provides that the District may impose special assessments on benefitted lands within the District; and

WHEREAS, it is in the best interests of the District to proceed with the imposition of the special assessments for operations and maintenance in the amount set forth in the Adopted Budget; and

WHEREAS, the District has previously levied an assessment for debt service, which the District desires to collect for Fiscal Year 2018/2019; and

WHEREAS, Chapter 197, *Florida Statutes*, provides a mechanism pursuant to which such special assessments may be placed on the tax roll and collected by the local tax collector ("Uniform Method"), and the District has previously authorized the use of the Uniform Method by, among other things, entering into agreements with the Property Appraiser and Tax Collector of the County for that purpose; and

WHEREAS, it is in the best interests of the District to adopt the assessment roll ("Assessment Roll") attached to this Resolution as Exhibit "B," and to certify the portion of the Assessment Roll related to certain developed property ("Tax Roll Property") to the County Tax Collector pursuant to the Uniform Method and to directly collect the portion of the Assessment Roll relating to the remaining property ("Direct Collect Property"), all as set forth in Exhibit "B;" and

WHEREAS, it is in the best interests of the District to permit the District Manager to amend the Assessment Roll adopted herein, including that portion certified to the County Tax Collector by this Resolution, as the Property Appraiser updates the property roll for the County, for such time as authorized by Florida law.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF SUPERVISORS OF THE AVLON GROVES COMMUNITY DEVELOPMENT DISTRICT:

SECTION 1. BENEFIT & ALLOCATION FINDINGS. The provision of the services, facilities, and operations as described in **Exhibit "A"** confers a special and peculiar benefit to the lands within the District, which benefit exceeds or equals the cost of the assessments. The allocation of the assessments to the specially benefitted lands is shown in **Exhibits "A" and "B,"** and is hereby found to be fair and reasonable.

SECTION 2. ASSESSMENT IMPOSITION. Pursuant to Chapter 190, *Florida Statutes*, and using the procedures authorized by Florida law for the levy and collection of special assessments, a special assessment for operation and maintenance is hereby imposed and levied on benefitted lands within the District and in accordance with **Exhibits "A" and "B."** The lien of the special assessments for operations and maintenance imposed and levied by this Resolution shall be effective upon passage of this Resolution. Moreover, pursuant to Section 197.3632(4), *Florida Statutes*, the lien amount shall serve as the "maximum rate" authorized by law for operation and maintenance assessments.

SECTION 3. COLLECTION AND ENFORCEMENT; PENALTIES; INTEREST.

- A. **Tax Roll Assessments.** The operations and maintenance special assessments and previously levied debt service special assessments imposed on the Tax Roll Property shall be collected at the same time and in the same manner as County taxes in accordance with the Uniform Method, as set forth in **Exhibits "A" and "B."**
- A. **Direct Bill Assessments.** The operations and maintenance special assessments and previously levied debt service special assessments imposed on the Direct Collect

Property, as well as debt service special assessments imposed for the Special Assessment Bonds, Series 2017A-2 (Assessment Area Two Project), shall be collected directly by the District in accordance with Florida law, as set forth in **Exhibits "A" and "B."** Assessments directly collected by the District are due according to the following schedule:

- Debt service assessments 60% (Series 2017 and 2017A-1) and 50% (Series 2017A-2) due no later than April 15, 2019, and 40% (Series 2017 and 2017A-1) and 50% (Series 2017A-2) due no later than October 15, 2019; and
- Operations and maintenance assessments 25% due on each of October 1, 2018, January 2, 2019, April 1, 2019, and July 1, 2019.

In the event that an assessment payment is not made in accordance with the schedule stated above, the whole assessment – including any remaining partial, deferred payments for Fiscal Year 2018/2019, shall immediately become due and payable; shall accrue interest, penalties in the amount of one percent (1%) per month, and all costs of collection and enforcement; and shall either be enforced pursuant to a foreclosure action, or, at the District's sole discretion, collected pursuant to the Uniform Method on a future tax bill, which amount may include penalties, interest, and costs of collection and enforcement. Any prejudgment interest on delinquent assessments shall accrue at the rate of any bonds secured by the assessments, or at the statutory prejudgment interest rate, as applicable. In the event an assessment subject to direct collection by the District shall be delinquent, the District Manager and District Counsel, without further authorization by the Board, may initiate foreclosure proceedings pursuant to Chapter 170, *Florida Statutes*, or other applicable law to collect and enforce the whole assessment, as set forth herein.

B. Future Collection Methods. The decision to collect special assessments by any particular method – e.g., on the tax roll or by direct bill – does not mean that such method will be used to collect special assessments in future years, and the District reserves the right in its sole discretion to select collection methods in any given year, regardless of past practices.

SECTION 4. ASSESSMENT ROLL. The Assessment Roll, attached to this Resolution as **Exhibit "B,"** is hereby certified for collection. That portion of the Assessment Roll which includes the Tax Roll Property is hereby certified to the County Tax Collector and shall be collected by the County Tax Collector in the same manner and time as County taxes. The proceeds therefrom shall be paid to the District.

SECTION 5. ASSESSMENT ROLL AMENDMENT. The District Manager shall keep apprised of all updates made to the County property roll by the Property Appraiser after the date of this Resolution, and shall amend the Assessment Roll in accordance with any such updates, for such time as authorized by Florida law, to the County property roll. After any amendment of the Assessment Roll, the District Manager shall file the updates in the District records.

SECTION 6. SEVERABILITY. The invalidity or unenforceability of any one or more provisions of this Resolution shall not affect the validity or enforceability of the remaining portions of this Resolution, or any part thereof.

SECTION 7. EFFECTIVE DATE. This Resolution shall take effect upon the passage and adoption of this Resolution by the Board.

PASSED AND ADOPTED this 27th day of AUGUST, 2018.

That's fine we will be advancing our 30 day notice with last service date being on 08/25/18. We have advised of the problems with this project but they have fallen on death ears. I have personally been out to the site and spoken on numerous occasions and identified the areas that we take care, so any area that has not been mowed has not ever been discussed except for now when all of a sudden its a problem. We communicate when we are going out so many of these items can be discussed while on site or previous to service. We are mowing the ponds which don't have irrigation in them so not very sure how we can make any breaks.

Monitoring Plan and Success Criteria Project: Avalon Groves Collector Road

Mitigation

The mitigation proposed for the Avalon Groves Collector Road is comprised of 144.30 acres of on-site wetland preservation. The mitigation proposed for the 8.93 acres of wetland impact within the Avalon Groves Collector Road site consists of preservation of a portion of the on-site wetlands (see attached Wetland Preservation Exhibit). The wetland vegetative community contains various tree species along with numerous understory and herbaceous species. The vegetation within these forested systems include red maple (Acer rubrum), pond pine (Pinus serotina), sweetbay (Magnolia Virginia), laurel oak (Quercus laurifolia), loblolly bay (Gordonia lasianthus), water oak (Quercus nigra), cabbage palm (Sabal palmetto), swamp tupelo (Nyssa sylvatica), royal fern Osmunda regalis), poison ivy (Toxicodendron radicans), wild azalea (Rhododendron viscosum), coinwort (Centella asiatica), pennywort (Hydrocotle umbellata), maidencane (Panicum hemitomon), spike rush (Eleocharis baldwinii), soft rush (Juncus effusus), Juncus spp., sedges (Carex sp. and Cyperus sp.), Digitaria sp., broomsedge (Andropogon virginicus), beakrush (Rhynchospora sp.), primrose willow (Ludwigia octavalvis), cattail (Typha sp.), pickerelweed (Pontedaria cordata), duck potato (Saggitaria lancifolia) and umbrella grass (Fuirena squarrosa), and wild elderberry (Sambucus canadensis). The wetland system will be preserved via a conservation easement dedicated to the District. following wetland preservation criteria will be utilized for on-site mitigation:

Success Criteria

As part of the activities that are designed to achieve the functional gains indicated in the UMAM Analysis, the success criteria for the wetland preservation will consist of the following:

Wetland Preservation

Greater than 85 percent coverage by desirable species after 5 years, Less than 5 percent areal coverage by nuisance and/or exotic species.

The wetland preservation area will be monitored on a bi-annual basis so that nuisance and exotic species, per the 2011 FLEPPC list, do not exceed 5% areal coverage in the wetland. Maintenance will be implemented on a quarterly basis with the goal of the event being the elimination the exotic component (i.e., 0% after event). Additionally, these areas will be placed under a conservation easement dedicated to the District.

The monitoring will consist of general qualitative observations in the wetland preservation areas. A summary of the data collected will be included in an annual report submitted to the District each year in April. The recorded data obtained from the vegetative monitoring will be provided to the District in report form and will be submitted on an annual basis. Reports will include the following:

- A. The dates and time of the monitoring event.
- B. The person responsible for performing the measurements.
- C. The analytical techniques or methods utilized.
- D. The results of such analyses including:
 - 1. Status of invader species
 - Coverage by wetland and FACW vegetation.
 - A description of any problems encountered during evaluation and proposed solutions.
 - 4. Photographs of the area.

In addition to the vegetative portion of the monitoring to be conducted, wildlife information will also be gathered and described in the report.

Success Criteria

The success criteria for the on-site wetland preservation areas will consist of greater than 85 percent coverage by desirable species after 5 years, and less than 5 percent areal coverage by nuisance and/or exotic species in the wetland.

Monitoring Schedule

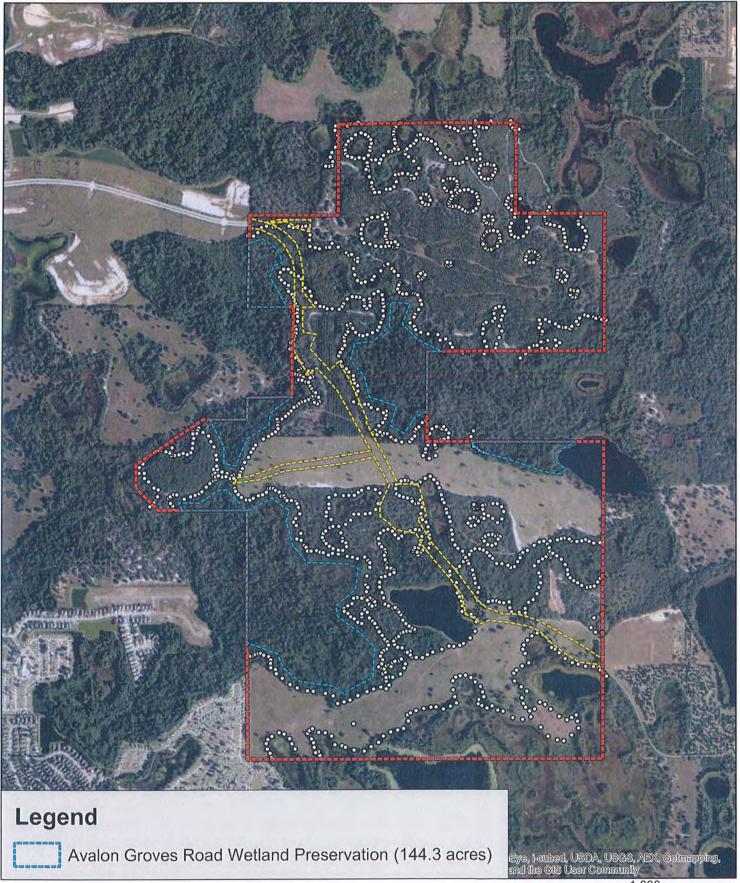

The schedule for the mitigation activities associated with the plan is as follows:

Bio-Tech Consulting, Inc. General Contract Conditions

SECTION 1: RESPONSIBILITIES

- 1.1 Bio-Tech Consulting, Inc. heretofore referred to as the "Consultant" has the responsibility for providing the services described under the "Scope of Services" section. The work is to be performed according to accepted standards of care and is to be completed in a timely manner.
- 1.2 The "Client", or a duly authorized representative, is responsible for providing the Consultant with a clear understanding of the project nature and scope. The Client shall supply the Consultant with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow the Consultant to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.

SECTION 2: STANDARD OF CARE

- 2.1 Services performed by the Consultant under this Agreement are expected by the Client to be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the Consultant's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, expressed or implied, is made.
- 2.2 The Client recognizes that conditions may vary from those observed at locations where observations and analysis has occurred, and that site conditions may change with time. Data, Interpretations, and recommendations by the Consultant will be based solely on information available to the Consultant at the time of service. The Consultant is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

3.1 Client will grant or obtain free access to the site for all equipment and personnel necessary for the Consultant to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted Consultant free access to the site. The Consultant will take reasonable precautions to minimize damage to the site, but it is understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.

SECTION 4: SAMPLE OWNERSHIP AND DISPOSAL

- 4.1 Any samples obtained from the project during performance of the work shall remain the property of the Client.
- 4.2 The Consultant will dispose of or return to Client all remaining samples 60 days after submission of report covering those samples. Further storage or transfer of samples can be made at Client's expense upon Client's prior written request.

- Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one percent (1%) per month, or the maximum rate allowed by law, on past due accounts.
- 5.3 If the Consultant incurs any expenses to collect overdue billing on invoices, the sums paid by the Consultant for reasonable attorney's fees, court costs, Consultant's time, Consultant's expenses, and interest will be due and owing by the Client.

- 7.2 Under this agreement, the term hazardous materials will include hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls and asbestos.
- 7.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. Consultant and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition mandating a renegotiation of the scope of work. Consultant and Client also agree that the discovery of unanticipated hazardous materials may make it necessary for Consultant to take immediate measures to protect health and safety. Client agrees to compensate Consultant for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous waste.
- 7.4 Consultant agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold Consultant harmless for any and all consequences of disclosure made by Consultant which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials.

7.5 Notwithstanding any other provision of the Agreement, Client waives any claim against Consultant, and to the maximum extent permitted by law, agrees to defend, indemnify, and save Consultant harmless from any claim, liability, and/or defense costs for injury or loss arising from Consultant's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by the Consultant which are found to be contaminated.

Re: Baseline Monitoring Report (May 2018)

Dear Mr. Wetzel:

Bio-Tech Consulting, Inc. (BTC) is corresponding to provide the St. Johns River Water Management District (SJRWMD) with the baseline monitoring report for the on-site wetland preservation for the approximately 52.04-acre Avalon Groves Roadway site located east of SR 27 on Sawgrass bay boulevard, within Section 13, 14, 23, 24, Township 24 South, Range 26 East, Lake County, Florida (Figures 1 & 2). This baseline monitoring report will include the following information:

- Monitoring and maintenance methodology;
- monitoring results of the wetland creation/restoration areas;
- incidental wildlife observation; and,
- photographs of the mitigation areas.

INTRODUCTION

The approved mitigation plan for the Avalon Groves Roadway site involves the 7.49 acres of wetland impacts, and a wetland preservation area (144.3 acres) placed under a conservation easement dedicated to the SJRWMD. The following monitoring report details the permit requirements for successful monitoring criteria and qualitative analysis of the wetland and upland areas.

MONITORING

Qualitative Monitoring

The monitoring will consist of general qualitative observations in the wetland preservation areas. A summary of the data collected will be included in an annual report submitted to the District each year in April. The recorded data obtained from the vegetative monitoring will be provided to the District in report form and will be submitted on an annual basis. Reports will include the following:

- A. The dates and time of the monitoring event.
- B. The person responsible for performing the measurements.
- C. The analytical techniques or methods utilized.
- D. The results of such analyses including:
 - 1. Status of invader species
 - 2. Coverage by wetland and FACW vegetation.
 - 3. A description of any problems encountered during evaluation and proposed solutions.
 - 4. Photographs of the area.

In addition to the vegetative portion of the monitoring to be conducted, wildlife information will also be gathered and described in the report. Information and exhibits as to the location of the sampling stations will be included within the Baseline Monitoring Report.

MANAGEMENT AND MAINTENANCE

Specific management practices will be employed within the wetland enhancement/wetland creation area that will consist of hand clearing activities and the utilization of herbicidal applications to eliminate invasive and exotic species, as needed. These management practices will be implemented in an effort to control and eradicate any invasive, exotic, or opportunistic species within the mitigation areas. All vegetation associated with the maintenance activities will be removed from the mitigation areas to eliminate the invasive/exotic species seed source. These management practices will be employed within the mitigation areas, as needed and in perpetuity.

All portions of the project's mitigation areas will be managed for the benefit of wildlife and vegetative composition. Obviously, the most important component of the management is treatment for control of invasive and exotic vegetation, in perpetuity. It is anticipated that the mitigation areas will require little long-term management once the natural systems succeed ecologically and become self-perpetuating. Maintenance will include removal of any invasive or exotic plant species (including, but not limited to cattails, primrose willow, cogon grass, golden

Tim Wetzel – SJRWMD Avalon Groves Roadway (BTC File #588-13) Baseline Monitoring Report (May 2018) Page 3 of 6

bamboo, etc...). No more than a 5% total coverage of such exotic or nuisance species shall occur between maintenance events.

It should be noted that during the 3-year monitoring period, maintenance is proposed to occur on a twice-monthly (2x/mth) basis for the first year (24 events) and monthly for the remaining two years (24 events). After that, maintenance will be on an as needed basis in perpetuity to maintain less than 5% total coverage of exotic or nuisance species.

REPORTING

An annual letter report will be filed with the SJRWMD within 60 days of the end of each year's monitoring event. The letter report will detail the status of the wetland enhancement/wetland creation area and its quantitative observations, the maintenance/management events that have occurred, any incidental wildlife sightings, and photographs of the wetland/upland preservation and wetland creation areas.

Success Criteria

The intent of this project is to provide the SJRWMD with quantitative results of the wetland enhancement/wetland creation area. Perpetual maintenance will be performed on a regular basis as detailed previously in order to ensure the integrity and viability of both the preservation and creation areas. As part of the activities that are designed to achieve the functional gains indicated in the UMAM Analysis, the success criteria for the wetland enhancement/wetland creation area will consist of the following:

Wetland Creation Area (WC-1)

- Greater than 85 percent coverage by desirable species after 3 years; and,
- Less than 5 percent areal coverage by invasive and/or exotic species.

The wetland preservation area will be monitored on a bi-annual basis so that nuisance and exotic species, per the 2011 FLEPPC list, do not exceed 5% areal coverage in the wetland. Maintenance will be implemented on a quarterly basis with the goal of the event being the elimination the exotic component (i.e., 0% after event). Additionally, these areas will be placed under a conservation easement dedicated to the District.

SUMMARY

The Avalon Groves Roadway wetland preservation areas were monitored on May 31, 2018, for the baseline monitoring event. Coverage of desirable native species was approximately 97% within the wetland preservation area and 97% within the upland preservation area during the baseline monitoring event. Category I and II exotic species identified includes Peruvian primrosewillow (*Ludwigia peruviana*) and caesarweed (*Urena lobata*). Coverage of the exotics was approximately 2% with Peruvian primrosewillow, caesarweed, and tropical soda apple occurring scattered through-out the wetland and upland preservation areas. Nuisance plant species consist of only bahiagrass (*Paspalum notatum*) located within the upland at approximately 1% areal coverage. Maintenance events have not yet started but will be performed on a monthly basis for the first year and then quarterly for years two thru five. Water levels within the wetland and upland preservation areas ranged from moist to 12 inches. These water levels and conditions were consistent with historic norms and seasonal variations for this

time of year; and recent and longer term weather patterns for this area of Central Florida. Monitoring events will be performed bi-annually in January and July for five (5) years with reports to follow or until SJRWMD sign off on the monitoring for the project.

Monitoring Plan and Success Criteria Project: Serenoa Phase 1A

Mitigation

The mitigation proposed for the Serenoa Phase 1A is comprised of 40.0 acres of on-site wetland preservation. The mitigation proposed for the 2.58 acres of wetland impact within the project site consists of preservation of the on-site wetlands (see attached Wetland Preservation Exhibit). The wetland vegetative community contains various tree species along with numerous understory and herbaceous species. The vegetation within these forested systems include red maple (Acer rubrum), pond pine (Pinus serotina), sweetbay (Magnolia Virginia), laurel oak (Quercus laurifolia), loblolly bay (Gordonia lasianthus), water oak (Ouercus nigra), cabbage palm (Sabal palmetto), swamp tupelo (Nyssa sylvatica), royal fern Osmunda regalis), poison ivy (Toxicodendron radicans), wild azalea (Rhododendron viscosum), coinwort (Centella asiatica), pennywort (Hydrocotle umbellata), maidencane (Panicum hemitomon), spike rush (Eleocharis baldwinii), soft rush (Juncus effusus), Juncus spp., sedges (Carex sp. and Cyperus spp.), Digitaria spp., broomsedge (Andropogon virginicus), beakrush (Rhynchospora spp.), primrose willow (Ludwigia octavalvis), cattail (Typha spp.), pickerelweed (Pontedaria cordata), duck potato (Saggitaria lancifolia) and umbrella grass (Fuirena squarrosa), and wild elderberry (Sambucus canadensis). The wetland system will be preserved via a conservation easement dedicated to the District. The following wetland preservation criteria will be utilized for on-site mitigation:

Success Criteria

As part of the activities that are designed to achieve the functional gains indicated in the UMAM Analysis, the success criteria for the wetland preservation will consist of the following:

Wetland Preservation

Greater than 85 percent coverage by desirable species after 5 years, Less than 5 percent areal coverage by nuisance and/or exotic species.

The wetland preservation area will be monitored on a bi-annual basis so that nuisance and exotic species, per the 2011 FLEPPC list, do not exceed 5% areal coverage in the wetland. Maintenance will be implemented on a quarterly basis with the goal of the event being the elimination the exotic component (i.e., 0% after event). Additionally, these areas will be placed under a conservation easement dedicated to the District.

The monitoring will consist of general qualitative observations in the wetland preservation areas. A summary of the data collected will be included in an annual report submitted to the District each year in April. The recorded data obtained from the vegetative monitoring will be provided to the District in report form and will be submitted on an annual basis. Reports will include the following:

- A. The dates and time of the monitoring event.
- B. The person responsible for performing the measurements.
- C. The analytical techniques or methods utilized.
- D. The results of such analyses including:
 - 1. Status of invader species
 - Coverage by wetland and FACW vegetation.
 - 3. A description of any problems encountered during evaluation and proposed solutions.
 - 4. Photographs of the area.

In addition to the vegetative portion of the monitoring to be conducted, wildlife information will also be gathered and described in the report.

Success Criteria

The success criteria for the on-site wetland preservation areas will consist of greater than 85 percent coverage by desirable species after 5 years, and less than 5 percent areal coverage by nuisance and/or exotic species in the wetland.

SECTION 1: RESPONSIBILITIES

- 1.1 Bio-Tech Consulting, Inc. heretofore referred to as the "Consultant" has the responsibility for providing the services described under the "Scope of Services" section. The work is to be performed according to accepted standards of care and is to be completed in a timely manner.
- 1.2 The "Client", or a duly authorized representative, is responsible for providing the Consultant with a clear understanding of the project nature and scope. The Client shall supply the Consultant with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow the Consultant to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.

SECTION 2: STANDARD OF CARE

- 2.1 Services performed by the Consultant under this Agreement are expected by the Client to be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the Consultant's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, expressed or implied, is made.
- 2.2 The Client recognizes that conditions may vary from those observed at locations where observations and analysis has occurred, and that site conditions may change with time. Data, Interpretations, and recommendations by the Consultant will be based solely on information available to the Consultant at the time of service. The Consultant is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

3.1 Client will grant or obtain free access to the site for all equipment and personnel necessary for the Consultant to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted Consultant free access to the site. The Consultant will take reasonable precautions to minimize damage to the site, but it is understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.

SECTION 4: SAMPLE OWNERSHIP AND DISPOSAL

- 4.1 Any samples obtained from the project during performance of the work shall remain the property of the Client.
- 4.2 The Consultant will dispose of or return to Client all remaining samples 60 days after submission of report covering those samples. Further storage or transfer of samples can be made at Client's expense upon Client's prior written request.

SECTION 5: BILLING AND PAYMENT

- 5.1 Consultant will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classification.
- 5.2 Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one percent (1%) per month, or the maximum rate allowed by law, on past due accounts.
- 5.3 If the Consultant incurs any expenses to collect overdue billing on invoices, the sums paid by the Consultant for reasonable attorney's fees, court costs, Consultant's time, Consultant's expenses, and interest will be due and owing by the Client.

- 7.2 Under this agreement, the term hazardous materials will include hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls and asbestos.
- 7.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. Consultant and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition mandating a renegotiation of the scope of work. Consultant and Client also agree that the discovery of unanticipated hazardous materials may make it necessary for Consultant to take immediate measures to protect health and safety. Client agrees to compensate Consultant for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous waste.
- 7.4 Consultant agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold Consultant harmless for any and all consequences of disclosure made by Consultant which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials.

7.5 Notwithstanding any other provision of the Agreement, Client waives any claim against Consultant, and to the maximum extent permitted by law, agrees to defend, indemnify, and save Consultant harmless from any claim, liability, and/or defense costs for injury or loss arising from Consultant's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by the Consultant which are found to be contaminated.

SECTION 8: RISK ALLOCATION

Within the limits and conditions of such insurance, Consultant agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by Consultant, its agents, staff, and consultants employed by it. The Consultant shall not be responsible for any loss, damage or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 8, whichever is less. The Client agrees to defend, indemnify and save consultant harmless for loss, damage or liability arising from acts by client, client's agent, staff, and other consultants employed by Client.

SECTION 10: DISPUTE RESOLUTION

- 10.1 All claims, disputes, and other matters in controversy between Consultant and Client arising out of or in any way related to this Agreement will be submitted to 'alternative dispute resolution' (ADR) such as mediation and/or arbitration, before and as a condition precedent to other remedies provided by law.
- 10.2 If a dispute at law arises related to the services provided under this Agreement and that dispute requires litigation instead of ADR as provided above, then:
 - (a) the claim will be brought and tried in judicial jurisdiction of the court of the county where Consultant's principal place of business is located and Client waives the right to remove the action to any other county or judicial jurisdiction, and

Re: Baseline Monitoring Report (May 2018)

Dear Mr. Wetzel:

Bio-Tech Consulting, Inc. (BTC) is corresponding to provide the St. Johns River Water Management District (SJRWMD) with the baseline monitoring report for the on-site wetland creation and enhancement for the approximately 141.9-acre Serenoa (AKA Avalon Groves) Villages 1&2 - Phase 1A site, located east of SR 27 on Sawgrass bay boulevard, within Section 13, 14, 23, 24, Township 24 South, Range 26 East, Lake County, Florida (Figures 1 & 2). This baseline monitoring report will include the following information:

- Monitoring and maintenance methodology;
- monitoring results of the wetland creation/restoration areas;
- incidental wildlife observation; and.
- photographs of the mitigation areas.

INTRODUCTION

The approved mitigation plan for the Serenoa Phase 1 site involves offsetting the proposed wetland impacts (3.41 acres) with the wetland preservation area (45.9 acres) placed under a conservation easement dedicated to the SJRWMD. The following monitoring report details the permit requirements for successful monitoring criteria and qualitative analysis of the wetland and upland areas.

MONITORING

Qualitative Monitoring

The monitoring will consist of general qualitative observations in the wetland preservation areas. A summary of the data collected will be included in an annual report submitted to the District each year in April. The recorded data obtained from the vegetative monitoring will be provided to the District in report form and will be submitted on an annual basis. Reports will include the following:

- A. The dates and time of the monitoring event.
- B. The person responsible for performing the measurements.
- C. The analytical techniques or methods utilized.
- D. The results of such analyses including:
 - 1. Status of invader species
 - 2. Coverage by wetland and FACW vegetation.
 - 3. A description of any problems encountered during evaluation and proposed solutions.
 - 4. Photographs of the area.

In addition to the vegetative portion of the monitoring to be conducted, wildlife information will also be gathered and described in the report. Information and exhibits as to the location of the sampling stations will be included within the Baseline Monitoring Report.

MANAGEMENT AND MAINTENANCE

Specific management practices will be employed within the wetland enhancement/wetland creation area that will consist of hand clearing activities and the utilization of herbicidal applications to eliminate invasive and exotic species, as needed. These management practices will be implemented in an effort to control and eradicate any invasive, exotic, or opportunistic species within the mitigation areas. All vegetation associated with the maintenance activities will be removed from the mitigation areas to eliminate the invasive/exotic species seed source. These management practices will be employed within the mitigation areas, as needed and in perpetuity.

All portions of the project's mitigation areas will be managed for the benefit of wildlife and vegetative composition. Obviously, the most important component of the management is treatment for control of invasive and exotic vegetation, in perpetuity. It is anticipated that the mitigation areas will require little long-term management once the natural systems succeed ecologically and become self-perpetuating. Maintenance will include removal of any invasive or exotic plant species (including, but not limited to cattails, primrose willow, cogon grass, golden

Tim Wetzel – SJRWMD Serenoa Phase 1 (BTC File #588-12) Baseline Monitoring Report (May 2018) Page 3 of 6

bamboo, etc...). No more than a 5% total coverage of such exotic or nuisance species shall occur between maintenance events.

It should be noted that during the 3-year monitoring period, maintenance is proposed to occur on a twice-monthly (2x/mth) basis for the first year (24 events) and monthly for the remaining two years (24 events). After that, maintenance will be on an as needed basis in perpetuity to maintain less than 5% total coverage of exotic or nuisance species.

REPORTING

An annual letter report will be filed with the SJRWMD within 60 days of the end of each year's monitoring event. The letter report will detail the status of the wetland enhancement/wetland creation area and its quantitative observations, the maintenance/management events that have occurred, any incidental wildlife sightings, and photographs of the wetland/upland preservation and wetland creation areas.

Success Criteria

The intent of this project is to provide the SJRWMD with quantitative results of the wetland enhancement/wetland creation area. Perpetual maintenance will be performed on a regular basis as detailed previously in order to ensure the integrity and viability of both the preservation and creation areas. As part of the activities that are designed to achieve the functional gains indicated in the UMAM Analysis, the success criteria for the wetland enhancement/wetland creation area will consist of the following:

Wetland Creation Area (WC-1)

- Greater than 85 percent coverage by desirable species after 3 years; and,
- Less than 5 percent areal coverage by invasive and/or exotic species.

The wetland preservation area will be monitored on a bi-annual basis so that nuisance and exotic species, per the 2011 FLEPPC list, do not exceed 5% areal coverage in the wetland. Maintenance will be implemented on a quarterly basis with the goal of the event being the elimination the exotic component (i.e., 0% after event). Additionally, these areas will be placed under a conservation easement dedicated to the District.

SUMMARY

The Serenoa Phase 1 wetland preservation areas were monitored on May 31, 2018, for the baseline monitoring event. Coverage of desirable native species was approximately 95% within the wetland preservation area and 95% within the upland preservation area during the baseline monitoring event. Category I and II exotic species identified includes Peruvian primrosewillow (Ludwigia peruviana), caesarweed (Urena lobata) and tropical soda apple (Solanum viarum). Coverage of the exotics was approximately 3% with Peruvian primrosewillow, caesarweed, and tropical soda apple occurring scattered through-out the wetland and upland preservation areas. Nuisance plant species consist of only bahiagrass (Paspalum notatum) located within the upland at approximately 2% areal coverage. Maintenance events have not yet started but will be performed on a monthly basis for the first year and then quarterly for years two thru five. Water levels within the wetland and upland preservation areas ranged from moist to 12 inches. These water levels and conditions were consistent with historic norms and seasonal variations for this

time of year; and recent and longer term weather patterns for this area of Central Florida. Monitoring events will be performed bi-annually in January and July for five (5) years with reports to follow or until SJRWMD sign off on the monitoring for the project.
